

Sparkling
PREMIUM

Sparkling, refreshing and non-alcoholic

Why is the juice red?

The cuvee of two different red flesh apples provides the red color, thanks to the red pigments (anthocyanins) with antioxidative effect.

With many important vitamins & nutritional values

High fibre, vitamin and mineral content together with other precious nutrients provides the basis for a healthy nutrition.

100% apple!

With no additives such as sugar, food colouring, preservatives and artificial vitamins.

Pleasant, slightly acidic taste

Anthocyanins provide a particular taste that is worth discovering. The slightly acidic and enjoyable aftertaste is completely different to traditional apple juices.

The juicing

Thanks to the simple cold-pressing process the juice retains its natural red colouring. The added carbonic acid provides a sparkling taste sensation.

Try RedMoon® Sparkling:

... pure and cooled without alcohol

... as a high quality ingredient for preparing long drinks and aperitifs

... as alternative for children to high sugar fruit beverages

... as an energising drink for athletes

... as juice food pairing

... as a perfect gift
